DOOR COMPANY

AWARD-WINNING, PATENTED FIBERCRAFT DOORS

How To Use This Catalog

This catalog offers pictures and descriptions of GlassCraft's entire offering of our award-winning FiberCraft series doors. To quickly and easily find additional information for individual doors, such as pricing or door options, scan the QR Code at the bottom of each page with your phone or tablet. This action will take you directly to the online catalog page that you scanned, and this page has additional product information. Alternatively, you can access this catalog page on our website with your computer.

Either way, as you access the online version of this catalog, you may click any individual door image, which will then open additional windows listing pricing, door options, available colors and sizes, prehang information, etc. for each door.

Why Choose a FiberCraft Composite Door

The primary reason is appearance. GlassCraft's composite doors look like real wood. No other fiberglass composite door has a more distinguished detail, a more refined tactile surface, or simply a more carefully crafted appearance than GlassCraft's Artisan and Estate finished fiberglass doors. Plus it is an environmentally friendly product and offers many options for customization to suit customer requirements. FiberCraft also offers an extensive selection of designs, including many unique options. See the multiple benefits of a FiberCraft entry door below.

Accessing The Catalog

Step 1

Scan the QR Code at the bottom of the catalog page with your Mobile device. The online version of that page pops up.

Step 2

Click on the + sign to get a quick pricing overview. From this page, click on More Details button to view the details page.

Step 3

View the detailed product page with info on options, pre-finishing, door slab and prehung pricing.

The Benefits of GlassCraft's FiberCraft Doors

- Authentic and Realistic wood grains
- Patented CFC-Free "green" polyurethane BioFoam core in Premium Series doors
- Patented Award-Winning Low VOC and HAP-free finishing process
- Patented Artisan door distressing process
- Patented real handmade external wrought iron grille options
- Patented GBG grille options
- High resistance to extreme temperature fluctuations
- Door and sidelite frames will not rot, warp, split or crack
- Full-size doors available for replacement in your current home
- Limited lifetime warranty for Premium Series
- Impact tested and approved entry configurations
- Energy Star® qualified for a variety of door configurations
- Composite pre-hung entry options with transoms and sidelites
- Rustic door options with speakeasies, straps and clavos
- Solid reinforced stiles from top to bottom eliminating thermal deflection for Premium Series doors
- Narrow Profile door series offers trending design to personalize your home

The FIBERCRAFT PRO SERIES AND PREMIUM SERIES

Two Series of FiberCraft Doors to Choose From

Available are two different FiberCraft Door Series: the PRO-SERIES and the PREMIUM-SERIES. The **FiberCraft Pro Series** includes a 5-year warranty on both the door and the finish performance. This door features a high-definition Cherry wood grain on both 6'8" and 8'0" tall doors with a rot-free composite bottom rail, and lock-blocks on both door edges. The Pro Series is available with all Estate wood finish options. The Pro Series cherry doors look virtually identical to the Premium Series cherry wood grained doors, but at a lower price.

FiberCraft Premium Series doors are the strongest, best-built fiberglass composite doors available. These doors include a lifetime warranty on the door slab and a 5-year warranty on the door finish. They are constructed with full length, full width door stiles built into BOTH long side edges of the door to virtually eliminate thermal warping and deflection in cold weather. Plus this method adds significant strength to the door. These door stiles are produced using an LSL Laminated Strand Lumber beam made from sustainable Aspen timber, and they use our patented BioFoam door core — both are green innovations that provide a strong, high-performance door. This Premium Series is available with all Estate and Artisan door finish colors and wood grains.

Visit www.glasscraft.com for warranty details.

BENEFITS	GlassCraft Premium Series	GlassCraft Pro Series	Other Door Brands
High-Definition wood grains	✓	✓	?
Plant-based 3 lb. density urethane bio-foam	✓	no	no
Standard 2-pound density urethane foam	not needed	✓	✓
Water-blown foam	✓	✓	?
Reinforced Stiles on both door edges	✓	no	no
Lock blocks on both door sides	not needed	✓	no
Composite rails to eliminate moisture	top and bottom	bottom only	no
Solvent-free finishing system	✓	✓	no
Very low VOC finishing process	✓	✓	no
No HAPs emitted in finishing	✓	✓	no
Low toxicity MDI used in production	✓	✓	no
No Styrenes in foam or finishing	✓	✓	no

Pro Series

- A** Bottom Rail is made from composite material and is rot-resistant and waterproof.
- B** Wood stiles with lock-blocks used on BOTH door edges for strong mounting of door hardware on either right or left side of door. Top rail is made of wood.
- C** The core of the door is filled with a 2-pound density urethane foam for good insulation performance.
- D** Award-winning Estate prefinish options provide the most authentic wood grains. These prefinish options utilize a water-based process that emits zero hazardous air pollutants.
- E** The fiberglass reinforced door skin exactly imitates highly detailed wood door grains for a high-definition wood appearance.

Premium Series

- A** Top and Bottom Rail utilizes 100% recycled composite content and is completely rot-resistant and waterproof.
- B** LSL Laminated Strand Lumber stiles used on BOTH door edges virtually eliminate the potential for warping, and provide a secure mounting for door hardware on either door edge.
- C** The core of the door is filled with patented BioFoam®, a unique insulating foam produced utilizing plant-based oil sources. This 3-pound foam is 50% more dense than Pro-Series.
- D** Award-winning Estate & Artisan prefinish options provide beautiful authentic wood grains. These prefinish options utilize a water-based process that emits zero hazardous air pollutants.
- E** Both door edges are constructed using hard-rock maple for screw holding strength and beauty.
- F** The fiberglass reinforced door skin exactly imitates highly detailed wood door grains for a high-definition wood appearance.

FiberCraft Door Sizes and Heights

FiberCraft Premium and Pro doors are made to the full-size widths as listed in this catalog, and are constructed to industry standard heights of **79-1/4" for 6'8" doors and 95-1/4" for 8'0" doors**. Full height doors are available for most Premium Series door styles at an extra charge — please inquire.

12 FIBERCRAFT WOOD GRAIN TEXTURES

Select from different wood grain textures and door panel profiles

Choose from one of the following 4 wood grains, each available in 3 finish-texture levels — for a total of 12 unique options. Different door profiles offer different wood grain choices and different panel profiles — these options are shown below. Premium Artisan Collection wood grains are available with a factory prefinish only. Estate Collection wood grains are available unfinished or with a factory prefinish.

CHERRY

Estate Cherry wood grain and panel profile available unfinished or prefinished

Artisan Antique Cherry grain and panel profile available prefinished only

Artisan Distressed Cherry grain and panel profile available prefinished only

KNOTTY ALDER

Estate Knotty Alder wood grain and panel profile available unfinished or prefinished

Artisan Antique Knotty Alder grain and panel profile available prefinished only

Artisan Distressed Knotty Alder grain and panel profile available prefinished only

MAHOGANY

Estate Mahogany wood grain and panel profile available unfinished or prefinished

Artisan Antique Mahogany (shown with Craftsman Door panel) available prefinished only

Artisan Distressed Mahogany wood grain and panel available prefinished only

FIR

Estate Fir Craftsman/Shaker panel and wood grain available unfinished or prefinished

Artisan Antique Fir panel and wood grain available prefinished only

Artisan Distressed Fir wood grain and panel available prefinished only

THE DIFFERENCE IS IN THE FINISHING: ESTATE & ARTISAN

Estate Collection® Finish Options for Pro or Premium Series Doors

Looks so good, you'll think it's wood.®

GlassCraft's Estate and Artisan Finish Collection features the most authentic wood grains and wood appearance unlike any other fiberglass doors available. Estate Finish Collection is available on Pro Series and Premium Series doors in all wood grain textures. The Artisan Finish is offered on all Premium Series doors in all wood grain textures in Antique and Distressed options. Each finish features the beautiful details, warmth and color like that of real wood even up close.

The Estate Collection® Factory Finish options are available for both the Pro-Series and Premium-Series, and maximize the beauty and richness of our real Mahogany, Knotty Alder, Fir and Cherry woodgrains by utilizing a long-lasting, multi-layered and multi-colored UV Finish process. This 10-step finish process combines multiple coats of stains and a clear Ultra Violet UV topcoat to preserve the beautiful appearance of your door, and provides natural and authentic wood grain and color finish on a fiberglass/composite door that has been designed to last.

Any of these five Estate Collection finish colors (shown at right) are available on any wood-grained door listed in this catalog. Only the black option is available on smooth doors without a wood grain.

This patented finishing system applies multiple layers of beautifully colored stains and protective crystal clear UV finish coats while making the process environmentally friendly. Each coat is steeped with ultraviolet UV-inhibitors and enhanced by additional technology to keep your door looking beautiful. This system produces a finish that is unmatched by any other fiberglass door.

GlassCraft Door Company's Estate & Artisan Finishing Process was awarded the Texas Environmental Excellence Award in 2014. In addition, these composite doors won the Window & Door 2014 Crystal Achievement Award for Unique Innovation and the 2014 National Manufacturing Leadership Award for Sustainability.

GlassCraft's factory finish includes a 5-year finish warranty. Visit www.glasscraft.com for details.

Environmentally Excellent prefinishing options with 5-Year Finish Warranty

Please Note: The photos on this page and throughout this catalog offer an indication of the actual appearance of the colors, but due to variations in the texture, grain pattern, and colors used in this hand-finished process, the actual appearance of the color may vary.

ARTISAN ANTIQUE FINISH COLLECTION for Premium-Series

Artisan Collection® Antique Finish Options for Premium Series Doors

Enjoy all the charm and character of real wood doors without all the maintenance. With GlassCraft's award-winning finish system, the Artisan Antique Collection of finishes are not only beautiful, but also long-lasting, with the most authentic wood grains that look like real wood. The Artisan Antique Finish options feature specially formulated antique patinas with depth and richness of color, enhanced with beautiful wood grain patterns.

GlassCraft's patented finish process enhances the stains with long-lasting, multi-layered, and multi-colored UV Finish. This 12-step finish process combines multiple coats of stains and clear UV topcoats with ultraviolet inhibitors to preserve the beautiful appearance of the door.

All colors shown on these pages are available on all Premium composite doors with a wood grain. Not available on smooth doors without a wood grain or on any Pro-Series doors.

Available on Premium-Series doors in four wood grains: Antique Mahogany, Antique Knotty Alder, Antique Fir, and Antique Cherry. Please note: the photos on this page and throughout this catalog offer an indication of the actual appearance of the colors, but due to variations in the texture, grain pattern, and colors used in this hand-finished process, the actual appearance may vary.

Shown with Artisan Antique finish with Knotty Alder wood grain. Features nuanced wood colors and rich undertones produced by GlassCraft's award-winning prefinishing system.

Close-up of Artisan Antique Laurel Grey finish.

Artisan Antique Finishes & Color Description:

- Pecan Antique - Lighter than Weathered Saddle and darker than Gunstock, features rich caramel undertones.
- Gunstock Antique - Features warm golds and browns, deep umber and ochres.
- Weathered Saddle Antique - Deep rich ambers with warm honey highlights and dark umber streaks.
- Rosewood Antique - A deep mocha with subtle ruby streaks and a black glaze.
- Espresso Antique - A dark grey/black with coffee undertones.
- Onyx Antique - Very dark grey with a hint of a cool brown.
- Midnight Grey Antique - True dark; lighter than Espresso without the coffee highlights.
- Sable Grey Antique - A medium/dark grey with a sable brown tint.
- Laurel Grey Antique - A medium/dark grey with slight cool green undertones. Shown at left.

ARTISAN DISTRESSED FINISH COLLECTION for Premium-Series

Artisan Collection® Distressed Finish Options for Premium Series Doors

A GlassCraft exclusive — the Artisan Distressed Finish options feature a patented process to beautifully create high-definition distress marks and enhanced wood grain patterns to simulate old, antique doors. Scuffs and scratches, wood checks and cracks, worm holes and wear marks are randomly applied to the surface of the door. These marks are then enhanced with our patented finish process to create the perfect shabby-chic entryway statement!

This finish process enhances the stains, grains, and distress marks with long-lasting, multi-layered, and multi-colored UV Finish. This 12-step finish process combines multiple coats of stains and clear UV topcoats with ultraviolet inhibitors to preserve the beautiful appearance of the door.

All colors shown on these pages are available on all Premium Series composite doors with a wood grain. Not available on smooth doors without a wood grain or on any Pro-Series doors.

Artisan Distressed finishes are available on Premium-Series doors in 4 wood grains: Mahogany, Knotty Alder, Fir, and Cherry. Please note: the photos on this page and throughout this catalog offer an indication of the actual appearance of the colors, but due to variations in the texture, grain pattern, and colors used in this hand-finished process, the actual appearance will vary.

Artisan prefinishing with Distress marks is perfect for achieving authentic rustic details. The faux mortise and tenon pegs are standard on Artisan Distressed Craftsman doors, as shown in the inset photo above.

Close-up of Artisan Distressed Pecan finish.

- A** Patented Artisan finish with richness and dept of color similar to the nuanced colors of real wood. Looks and feels like real wood!
- B** Realistic wood patterns to mimic the natural characteristics of Cherry, Fir, Knotty Alder, and Mahogany wood.
- C** Optional V-Grooved detail for an authentic rustic look.
- D** Authentic Distress marks using patented laser technology.

“Looks so good, you’ll think it’s wood.”®

PRE-HUNG IMPACT and WINDSTORM RATED DOORS

Impact Rated and Coastal Windstorm Approved

Protect your family and your home with GlassCraft's Impact Rated and tested doors. Look for doors and entryways with the Impact logo shown below to ensure a high level of safety and security against break-ins and weather related impacts. Doors and entryways with this designation are available at an additional cost. To be approved by building inspectors for use in coastal areas, the unit must be ordered from GlassCraft as an assembled Windstorm-Impact Approved entryway.

GlassCraft Premium Fiberglass Composite doors and entryways have been evaluated for compliance and are approved for installation in designated catastrophe areas along the Florida and Texas coastal areas when installed as required and as specified in the International Residential Code (IRC) and the International Building Code (IBC). Both 6'8" tall and 8'0" tall entryways have been certified in a variety of entryway configurations, including single doors, double doors, single doors with 1 or 2 sidelites. Solid doors, Speakeasy doors, and doors with glass have been approved with in-swing configurations.

50 DP Rating Available for Select Impact & Windstorm Tested Composite Doors.

Visit www.glasscraft.com for complete information on DP Ratings, approval numbers and availability for Impact tested product configurations.

Available Impact Configurations

Available Impact products include the Impact Logo at the bottom of the individual catalog page. All pre-hung units shown include the use of composite jamb materials — no wood parts are used. We also use double jamb legs (no mull posts) between sidelites and the door, and a continuous sill.

Prefinished Composite Pre-hung Entryways: The 4 entry configurations shown are available professionally prefinished to match our fiberglass doors. Refer to pages 5-9 for factory finish color options.

Composite Components: Jamb legs, brick mold, "fat boy" mull posts, outside mullion, quarter-round and T-astragals are available. Over 90% of the material used to produce our composite components are produced from recycled plastic and wood. It accepts nails, staples, and screws within 1/2" of edge, and it has a low linear expansion from high or low temperature. Non-splintering, it will not twist and has excellent screw and nail retention. Cuts with any fine-tooth miter saw, and routes out beautifully with little or no chipping or ragged edges. Accepts paint and stain like real wood, and does not need priming.

Solid Composite Frames: Offered with Windstorm rated Impact pre-hung units. The composite material used in the door frames and trim is a wood-plastic composite with a wood grain. These "no-rot, no-warp" frames may be stained or painted, and the pre-hung units are available factory finished to match a prefinished fiberglass door. "Impact" rated pre-hung units are approved by the states of Florida and Texas.

IMPACT Pre-hung "Inswing" and "Outswing" Units: We can pre-hang the four entryway configurations shown at left using our 3'0" or 2'8" wide and 6'8" or 8'0" tall fiberglass doors and sidelites. These four units are available as both "inswing" and "outswing" units. Pre-hung units include brick mold, door sweep, weatherstripping, and adjustable threshold, plus 4 hinges on both 6'8" and 8'0" doors, and astragals where applicable. IMPACT pre-hung units also include all door lock set and handle set hardware and a multipoint lock system. Please note that the multipoint handleset must include a lever-action model, not a thumb latch.

AESTHETICS, SECURITY, SUSTAINABILITY

Solid and Strong Patented PLUGLESS FRAMES

The Door Lite Frame is the moulding assembly that holds the glass in the door. GlassCraft's patented door lite frames are produced using an extruded solid WPC wood-polymer-composite material and are solid (not hollow) for super strength. These frames do not use external fasteners that require frame plugs to hide the screws, but rather incorporate a multi-patented clip system that does not require external screws or frame plugs. This unique frame system allows for the replacement of your door glass should it be damaged or broken. No need to replace the entire door as with other "plugless" frame systems. Plus they are impervious to moisture, and resist damage due to rot and mildew. Strong and secure, these frames are also tested and approved for our Impact-Rated doors and entryways.

Door moulding shown at left above does not use unsightly screws to mount the frame on the door. Photo at right shows the patented design of the frame to create a strong and moisture-proof barrier.

Sustainability and Energy Efficiency - Patented BioFoam

GlassCraft Door Company has taken its product innovation further by incorporating environmentally friendly materials and processes in the production of its fiberglass doors and frames. GlassCraft has been awarded multiple industry honors in recognition of its DuraFinish™ fiberglass finishing system and BioFoam® premium core, both patented technologies that produce better doors in terms of appearance, performance and environmental benefits.

AWARD-WINNING INNOVATION:

- 1) The DuraFinish™ Fiberglass Finishing System — this patented technology involves the use of water-based finishing instead of solvent-based finishing. Benefits include 100% reduction in Hazardous Air Pollutants, very low VOC, improved air quality in the workspace, superior weatherability and authentic woodgrain appearance.
- 2) BioFoam® Premium Foam Core — an alternative to standard polyurethane foams, GlassCraft's Bio-Foam contributes to green building sustainability and reduced fossil fuel usage. BioFoam® is a patented plant-based, formaldehyde-free, water-blown, rigid, closed-cell foam formulated for GlassCraft for use in its FiberCraft® Premium Composite doors. This foam is a giant leap forward in regard to environmental and health benefits, while contributing to the superior performance of GlassCraft's fiberglass doors.

ENERGY SAVINGS with ENERGY STAR

FiberCraft® composite doors are available with Energy Star Rated options which include solid doors, contemporary doors, speakeasy doors and Craftsman-style doors. U-Value ranges from 0.18 to 0.26 and an SHGC Value ranging from 0.01 to 0.10. These energy efficient doors can help save on energy consumption while providing your home with beautiful door options.

Visit www.glasscraft.com for more details.

PRE-HUNG OPTION & ADVANTAGES

PRE-HUNG ALL-COMPOSITE ENTRYWAYS WITH CONTINUOUS SILL

PRE-HUNG OPTION

GlassCraft doors in this catalog can be ordered as pre-hung door units. Drawings and part numbers for available configurations of pre-hung doors are shown via our online catalog.

All entryway configurations (except Impact rated units) available for FiberCraft doors include "continuous" one-piece sills. This means that the bottom sill or threshold is made from one continuous piece of threshold material which adds strength and prevents leaking under the entryway. This assembly design is especially important with configurations that include 1 or 2 sidelights. Other manufacturers may produce this entry configuration using a "boxed" construction method with separate sills for each sidelight.

GlassCraft uses a 1-piece sill construction method for reinforced strength and enhanced appearance.

PRE-HUNG COMPONENTS

Standard Pre-hung entryways include the following:

- 4-9/16" Jamb Legs
- Header
- Standard Sill
- Hinges
- Weatherstrip
- T-Astragal (where applicable)
- Flush Bolt (where applicable)
- Mull Posts (where applicable)

Optional Pre-hung components at extra charge:

- 6-9/16" Jamb Legs
- Brick Mold
- Endura Sill
- Door Sweep
- Door Bore
- Strikejamb Reinforcement
- Construction Doors

Use your cell phone camera
or QRC scan app to **SCAN**
for **Finish Pricing**>

FIBERCRAFT PRE-HUNG DOOR OPTIONS

All-Composite Components

GlassCraft Premium Series and Pro Series Fiberglass Composite Doors in this catalog can be ordered as a pre-hung door unit. Configuration drawings and pricing for pre-hung doors are available via our online catalog. GlassCraft uses our exclusive all-composite material in all FiberCraft pre-hung entryways. This WPC (wood polymer composite) material resists decay and rot, is impervious to weather, and will not crack or split like wood jamb legs. All jamb legs, headers, brick mold and sills utilize composite materials and no wood parts are used in the pre-hang components.

Standard pre-hung units include 4-9/16" wide jamb legs, jamb header, adjustable threshold, weatherstripping, plus 3 ball-bearing hinges on 6'8" tall doors and 4 ball-bearing hinges on 8'0" tall doors, brick mold, plus T-astragal (for double doors), and mull post and flush bolts (where needed and applicable). Pre-hung unit options include door sweep, brick mold, 6-9/16" wide jamb, Endura or ADA sills, StrikeJamb reinforcement, and door boring for hardware.

Unfinished in tan color. Easily paintable and stainable composite jamb material.

Prefinished and shown with detailed wood grains. Composite jamb material will not rot, warp, split or crack.

Composite Transom Options

Transoms are available with the Grille-Between-Glass, Simulated Divided Lite, and Clear & Privacy glass options. Transoms are available in direct-set configurations only (no sash around the glass). Each transom is available in varying widths, depending upon the door or door and sidelite configuration below the transom. Transoms are made with GlassCraft composite jamb system and can be stained or painted.

Composite Door Frames with STRIKEJAMB™

All FiberCraft pre-hung doors are available with a steel-reinforcement StrikeJamb™ as an option. Pre-hung units include jamb legs, T-astragal (for double doors), standard sill, header, weatherstripping, and adjustable threshold, plus 3 ball-bearing hinges on 6'8" tall doors and 4 ball-bearing hinges on 8'0" tall doors.

The StrikeJamb™ reinforcement can be installed on the lock side jamb leg for safety and security. This plate reinforces the jamb leg, and allows the dead bolt and the handleset bolt to throw so that the bolts extend through the corresponding holes in the steel reinforcement plates. In addition, long mounting screws should be used with this StrikeJamb, these screws extending through the jamb leg, then through the steel plate, and finally into the wall studs.

Image at right shows the reinforcing plate from the back jamb leg side. This metal plate is hidden from view after installation.

PRE-HUNG OPTION & ADVANTAGES

Sill and Sill Color Options

All standard pre-hung exterior door units use adjustable composite sills that help prevent water penetration, rotting, warping, and discoloration. Our standard adjustable composite sill includes a peel-off protection film which protects the sill during the house construction, and is made from 100% composite and aluminum materials. The "adjustable" feature allows the top of the sill to be adjusted with a screwdriver to match the correct height required for the bottom of the door. Optionally, you may select the Endura® Brand adjustable composite threshold or an ADA threshold. The ADA threshold is approved for use with wheelchairs. ADA sills are 5" x 1/2" or 7" x 1/2". The Endura Z-Series Sill System (for an extra charge) provides a walnut colored sill cap, the adjustable feature, and a hard plastic protective construction cover.

Hinge Color Options

All pre-hung 6'-8" tall units use three 4-inch ball-bearing hinges, while 8'-0" tall units use four hinges. Choose from the three hinge color options shown at left for your pre-hung entry door unit: Oil Rubbed Bronze, Satin Nickel or Flat Black.

BUFFALO FORGE® CAST BRONZE & BRASS ENTRYSETS

Single or Multipoint Hardware features Cast Bronze or Forged Brass Handleset & Lock Options

Our BUFFALO FORGE brand lock sets are produced by hand-made processes utilizing molten sand-cast bronze or forged brass, and feature solid construction and precision engineered lock mechanisms. These are large lock sets with long escutcheon trim plates and they give a very heavy and strong, secure feel. Excellent design and style, with several models available for different door designs. This hardware has the look and feel of hardware costing three times the price. All use a standard Y1 Keyway. 2 keys provided. 2-3/8" backset.

casting the escutcheon plate

All of the lock sets shown on the following two pages are available with standard 2-point models (latch and dead-bolt), or with a multipoint dead bolt. All lock sets are available with matching "dummy" lock sets, which are used for double-door installations. These dummy lock sets do not have any internal mechanism, no key hole, and no thumb latch and are mounted on the "inactive" door, with two-point or multipoint lock sets used on the "active" door. See example photo on page 18 of Dummy Set.

All lock sets shown may be used for right-hand or left-hand door swings and all hardware necessary is included for either installation including 2 lever latches. Installation into the door slab and jamb is included in the price of all of these standard and multipoint lock sets. All Buffalo Forge entrysets will fit all full-sized doors in this catalog.

- Each Buffalo Forge lock set is available in 2 of 4 colors: Dark Bronze or Oil Rubbed Bronze and Satin Nickel or Antique Nickel.
- Included with these Buffalo Forge lock sets are the lock cylinder, dead-bolt, matching screws and face plate(s).

Housing, lock cylinder, and 2 keys

Passage latch kit

Dead bolt latch kit

Matching screws

Buffalo Forge Multipoint Option

An excellent option for all Buffalo Forge handleset models on the next 2 pages is our multipoint dead bolt.

The multipoint functions exactly the same as any deadbolt, making this very intuitive and easy to operate. Instead of just 1 deadbolt, we offer this option that provides TWO dead bolts, adding a significant amount of security and strength to your entry door. In addition, this creates a tighter weather-seal, and helps to prevent against door warpage.

- 18-1/2" spacing between dead bolts
- Face plate is approx 24" long x 5/8" wide
- 1-inch dead bolt throw
- Stainless steel construction of mechanism
- Bronze cover plate and strike plates

This option will work on any handleset shown on the next two pages. Installation into the door slab and jamb is included in the price.

Door shown at right is a 4 Lite door with Rustic Arch handle and multipoint option.

ROCKWELL brand CAST BRASS ENTRYSETS

Single or Multipoint Lock Sets Add Security - Forged Brass Handle Set & Lock Options

These lock sets are produced by the traditional drop-forged process utilizing solid brass, and featuring heavy gauge construction, a precision engineered mechanism, and superior corrosion protection. All use a standard 5 pin SCI Keyway. Wide bow keys provided. 2-3/8" backset only.

All of the lock sets shown on the next two pages are compatible with the multipoint lock systems shown below. In addition, the **Windsor**, **Savoy**, and **San Jose** are also available as "one-point" traditional lock sets for both 6'8" and 8'0" tall doors. And all lock sets are available as "dummy" lock sets, which are used for double-door installations. These dummy lock sets do not have any internal mechanisms and are mounted on the "inactive" door, with one-point or multipoint lock sets used on the "active" door.

The **Sapphire** multipoint and dummy lock sets are also available with a special "PVD" coating on the handle set and stainless steel for the multipoint mechanism for use in coastal installation applications. These are noted as "Coastal" in the item descriptions. This PVD Physical Vapor Deposition coating is harder, more resistant to corrosion and abrasion, and provides a longer-lasting coating when used in coastal areas.

All lock sets shown may be used for right-hand or left-hand door swings and all hardware necessary is included. Installation into the door slab is included in the pricing of all of these one-point and multipoint lock sets.

Rockwell Multipoint Option

Increase security and peace of mind with Rockwell's multipoint lock option with deadlocking tongues built to work with traditional grip hardware. Choose from any of the multipoint handle set trim options shown on the next 2 pages. This multipoint system is activated with the turning of the dead-bolt lock. All 3 locking points are engaged only when the dead bolt point is locked by turning the thumb latch.

This multipoint lock set includes an anti-saw and kick-proof center dead-bolt for maximum security and a 90-degree consumer friendly locking operation, so you visually know the door is locked when the dead-bolt knob is in the horizontal position. In addition, these multipoint assemblies are produced using heavy-gauge steel with a zinc dichromate finish per ATSM-8633 testing standard. Stainless steel models are available for both 6'8" and 8'0" sizes for coastal installation.

Multipoint lock systems use our standard flush bolts installed on the passive door of a pre-hung double door, which gives the homeowner the option to include dummy handle sets on the passive door with all multipoint lock sets.

Precision-engineered components reduce the need for service calls, providing years of trouble-free service. These multipoint assemblies have been cycle-tested to exceed 300,000 locking cycles. Adjustable strike plates allow for field adjustment during and after installation. The design of these multipoint systems allows for right hand or left hand installation with the same part.

GlassCraft provides installation of the 3-point lock mechanism into the door, and installation charges are included in the cost of these lock sets. Installation involves precision machining of the edge of the door slab, which is performed with CNC machines to ensure precision.

When ordering for double doors, only 1 multipoint lock set is required. You may choose to include a "dummy" handle set on the inactive door for appearance purposes.

Door shown above is a 2 Panel V-Grooved door with Madrid speakeasy, square clavos and multipoint Windsor lock set.

ROCKWELL CAST BRASS ENTRYSETS - LEVER LATCH

Features & Benefits

- Solid brass, heavy gauge construction with precision-engineered mechanism
- Compatible with multipoint lock system (page 17)
- Available with one-point lock sets for 6'8" and 8'0" doors (for Windsor, Savoy, and San Jose)
- Dummy lock sets available for inactive door in a double door entryway (no internal mechanism)
- Special PVD coating option on multipoint and dummy locksets (for Satin Nickel Sapphire)

SOLID PANEL & SPEAKEASY ENTRY DOORS

FIBERCRAFT COLLECTION

The FIBERCRAFT SOLID PANEL & SPEAKEASY DOORS

Premium & Pro Series Solid Panel Doors

The Solid Panel Premium Series and Pro Series of solid doors provide an impressive range of options and finishes that fit a wide range of home styles.

Impact Approved Entryways for Security

This Solid Section includes "Impact Approved" door options. Look for the Impact Resistant logo, and refer to page 10 for more information. Please note that all entryways that feature our real exterior wrought iron speakeasy grilles include a special coating on the wrought iron parts. This coating is applied to metal parts to resist rusting and corrosion. While this coating significantly enhances the durability of these decorative wrought iron grilles, we do not warrant the grilles or hardware finish against corrosion.

Factory Finish Options

Choose from 23 color finish options and 4 wood grains in Estate and Artisan collection finish options. See pages 5-9 for photos of GlassCraft's available factory finish options.

Decorative Iron Straps & Clavos

Use decorative door straps (see page 12) for installation onto the face of a door to give it a rustic, or craftsman, or antique look. Door straps can be mounted on the interior, the exterior, or both sides. Straps may be used with or without the clavos shown on page 12. These door straps and clavos are hand-made and therefore vary slightly.

Door straps and clavos can be added to almost any door in any configuration.

V-Grooved Panel Option

GlassCraft's Premium and Pro Series 2-panel fiberglass doors are available with V-Grooved door panels. This popular detail adds a more rustic appearance to the door. These 2-panel doors may also be ordered without this V-Grooved option. Both doors are the same price.

Peephole Viewer Option

Add a peephole to your solid entry door and get a 180 degree view of your outside perimeter. Available in 2 colors — Satin Nickel and Oil Rubbed Bronze.

Use your cell phone camera or QRC scan app to **SCAN for More Information** about the Peephole Viewer.

Antique Cherry 2 Panel door with V-Grooved option, Impact speakeasy, Florentine hinge straps and round clavos.

With Canterbury straps and square clavos.

Cherry door panel with V-Groove option.

The FIBERCRAFT SOLID & SPEAKEASY DOORS

Speakeasy Grille Options

Most of our solid panel doors shown in this section may be ordered with our "speakeasy" option installed (see photo below). With this option a small, operable rectangular door is installed in the upper door panel at an approximate height of 5'6". This small door is hinged and latched from the interior side of the door. The speakeasy grilles are made of real wrought iron and are available in four designs, plus one "Impact rated" grille for use in coastal installations. All 8 glass options below are available. Impact speakeasy entryways must include the Impact Florentine speakeasy grille option.

Operable Seville speakeasy grille with Water glass

WR15 Madrid

WR103 Seville

WR105 Star

WR16 Florentine

WR100 IMPACT Florentine

Speakeasy Glass Options

Choose from 8 glass texture options to complement your speakeasy and door. Glass textures shown are produced using a double insulated glass unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies depending upon the glass texture chosen. The Water texture option offers a light obscured view or level of privacy. The Reeds texture option offers a moderate level of obscured view. Rain gives the highest level of privacy.

PRIVACY & PATTERNS ENTRY DOORS

FIBERCRAFT COLLECTION

THE FIBERCRAFT PRIVACY & PATTERNS COLLECTION

Clear & Texture Patterned Glass Entry Door Series

GlassCraft's Privacy and Clear Glass Entry Door Collection features a range of design options that can complement various architectural home styles such as Transitional, Coastal, Cottage, Farmhouse, New American and more.

Many premium options are available, including 7 glass options, 4 wood grains and 4 impact unit configurations. Check this section of the catalog to preview which door styles come with these 4 available impact rated configurations.

Wood Grain Options

Choose from four wood grain options depending upon the door profile, including:

- Mahogany
- Cherry
- Knotty Alder
- Fir

Impact Doors

All Privacy & Patterns Glass entry doors on the next page are available as Impact Rated doors, except for Craftsman doors and the 8'0" tall Full Lite doors. Impact doors have been tested and approved for use in Windstorm and Impact areas. Please refer to our web site for specific Design Pressure ratings of select Windstorm/Impact approved doors. Impact units come fully assembled and with a coastal hardware package consisting of installation screws, Sapphire Satin Nickel handleset and stainless steel multipoint lock set and hinges. Protective coastal film is applied to handlesets and iron grilles. The package price does not include a dummy handle set on double doors.

A pre-hung impact entryway includes 4-1/2" or 6-1/2" full composite jamb and exterior brick mold. The composite jamb can be stained or painted.

Textured Glass Options

Choose from 7 different glass options to complement your FiberCraft Privacy Glass entry door. The glass textures shown here are produced using a tempered double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies depending upon the glass texture chosen. The Water texture option offers a light obscured view or level of privacy. Large Flemish and Reeds glass options offer a moderate level of obscured view. Rain and Cloud offer the highest level of privacy. LowE coated clear glass is available in a few sizes.

NARROW PROFILE ENTRY DOORS

FIBERCRAFT COLLECTION

The FIBERCRAFT NP SERIES NARROW PROFILE DOORS

Smooth NP-Series NARROW PROFILE Doors

NP-Series fiberglass doors are available in 3 sizes, and as slabs or pre-hung in single and double door configurations with all composite components. Choose unfinished, or pre-finished in Black. These doors are flush-glazed (no raised moulding or insert frames) and are "stopped-in" on the interior side of the door with wood glass stop molding. Three glass options are shown below. With smooth fiberglass skin on both sides, these are Premium Series doors which feature a hardwood edge on both edges and a full-width composite top and bottom rail. All NP-Series doors have a solid Timberstrand® core — no foam, and can accept standard hardware including multipoint locks.

Product Information

- FiberCraft premium series doors have hardwood edges and composite top and bottom rails
- 3 door sizes available: 3'0" x 6'8", 3'0" x 8'0", 3'6" x 8'0"
- Three configurations available shown at right - each door configuration available in right or left hand
- 3" wide stiles and top rail - 10-1/2" inch bottom rail
- Smooth (no texture) fiberglass doors skins
- Solid Timberstrand door core - no foam - provides very strong door
- Three Insulated Glass Panels available for this door - in Clear, Reeds, or Cloud glass textures
- Use standard lock set hardware including multipoint locks.
- 6' 8" 1 Block -- block is 18-5/8" tall
6' 8" 2 Block -- block is 35-7/8" tall
8' 1 Block -- block is 22-5/8" tall
8' 2 Block -- block is 43-7/8" tall
- Door available pre-hung or as a slab
- Unfinished or with a factory finish in Black - Unfinished doors are white for painting by user
- Pre-hang configurations for single or double doors

CONTEMPORARY ENTRY DOORS

FIBERCRAFT COLLECTION

The FIBERCRAFT CONTEMPORARY DOORS

True Contemporary Design with Unique Flush Glazed Glass Panels

GlassCraft Contemporary doors offer a true “flush glazed” appearance by inserting the glass panel directly into the door without a separate door frame. From the exterior side of the door, the look is sleek, without raised moulding around the glass panel. From the “interior” side of the door, square glass “stops” hold the glass panel securely in place. This provides the opportunity for glass replacement, should an individual glass panel be broken. These doors may be ordered individually or assembled in full composite pre-hung jambs.

Only GlassCraft's Contemporary Series of Composite Entry Doors feature True Flush Glazed look with glass panels mounted directly into the door without raised moulding. The result is the sleekest modern look that's true to minimalist design conventions.

Or with NEW Aluminum Frame Glazed Glass Panels

New Contemporary door design includes GlassCraft's unique aluminum frames around glass panels and solid door panels. This functional and unique framing is mounted on both sides of the door, with no visible fasteners. These aluminum frames are brushed aluminum for Modern/Contemporary doors. These frames are 1-1/2" in width, with hidden fasteners. Broken glass may be de-glazed for replacement with this aluminum frame system.

Brushed aluminum glass / panel frame

Two Door Textures: Wood Grained Mahogany and Paintable Smooth

The Contemporary Collection FiberCraft doors are available in 2 textures:

- 1) Wood Grained Mahogany — Combines modern aesthetic with a warmth and inviting appeal like that of real wood. Available unfinished or factory pre-finished with a choice of Estate or Artisan finish.
- 2) Paintable Smooth — Easily paintable to match a specific color palette or scheme. Available unfinished in white smooth only.

Shown with Wood Grained Premium Mahogany.

Shown with Paintable Smooth texture with homeowner's color.

Glass Texture Options

Choose from these glass texture options to complement your door. These textures are produced using a double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies for each texture. Water glass offers a light obscured view, Reeds glass offers a moderate level of privacy, while Rain and Cloud provide the most privacy. Cloud is an opaque white frosted glass panel. Not all textures are available for every door. Options are indicated for each door on following pages.

DECORATIVE GLASS ENTRY DOORS

FIBERCRAFT COLLECTION

The FIBERCRAFT DECORATIVE GLASS DOORS

VitriLites® Decorative Glass Door Panels

GlassCraft's Decorative Glass Series features hand cut and beveled glass panels with unique glass clusters and a combination of glass textures that maximize brilliance and sparkle while offering a desired level of privacy.

No one makes better quality decorative glass panels for their doors and windows than GlassCraft. Each decorative glass panel was designed, crafted, assembled, and polished with artistry and performance in mind.

GlassCraft's VitriLites® Decorative Glass Door Panels offer these features:

- Beveled glass designs, each with multiple glass textures (except Sandringham)
- Triple-thick insulated glass panels for improved energy efficiency and security
- Six decorative glass designs to choose from: Brazos, Courtlandt, Marsais, Marsala, Sandringham and Cantania
- Came color for each glass panel design is listed for each door

Triple-thick IG Glass Panels for improved energy efficiency and security.

DIVIDED LITE & CRAFTSMAN ENTRY DOORS

FIBERCRAFT COLLECTION

The FIBERCRAFT DIVIDED LITE ENTRY DOOR COLLECTION

The SDL Divided Lite Entry Door Series Features Classic Designs

GlassCraft's Divided Lite series provides a selection of classic French doors and timeless Mission and Craftsman style doors. This collection of fiberglass composite doors will complement a wide range of architectural styles. The Divided Lite doors in this catalog feature double insulated glass panels for energy efficiency and security, and a new SDL construction. The Divided Lite Series provides an impressive range of options and finishes. See pages 5-9 for prefinishing swatches and details. These doors may be ordered individually or assembled in full composite pre-hung jambs. Choose from a wide range of design options. New designs and various SDL bar combinations are available.

Super Strong SDL Assembly

The Divided Lite doors are constructed with inter-locking SDL bars that snap into place for a stronger, more structurally sound assembly. Using advanced technology, the new SDL assembly features precision-cut bars that seamlessly snap together for improved performance and appearance. In addition, each muntin bar is nailed into the frame for extra security and strength. No unsightly plugs around the glass panel frame.

Divided Lite Door Construction

Divided Lite muntin bars give the look and feel of historic and traditional divided lite doors, but with improved performance and energy efficiency. Divided Lite grilles create the illusion of True Divided Lite "TDL" doors by placing composite muntin bars on the interior and exterior of one double insulated glass panel. Muntin bars are permanently fixed to the glass surface with special tape and are secured with pin fasteners to the glass frames at all points of contact. This allows for superior energy efficiency over TDL doors.

Divided Lite Impact Doors

Impact Divided Lite doors have been tested and approved for use in windstorm and Impact areas. Please refer to our website for specific Design Pressure ratings for windstorm/impact-approved Divided Lite doors. Impact entryways are available with clear insulated glass only, and do not have internal muntin bars.

Glass Texture Options for Divided Lite Doors

Choose from five different glass texture options to complement your Divided Lite composite entry door. The glass textures shown here are produced using a tempered double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies depending upon the glass texture chosen.

FIBERCRAFT CRAFTSMAN FIR & MAHOGANY DOORS

GlassCraft's Craftsman doors shown on these two pages utilize "flush glazing" that has no raised moulding around the glass panel. This flush-moulding appearance is identical on both the front and back sides of the door. These glass panels are replaceable if ever broken. This style of glazing is different from most other FiberCraft doors which have raised moulding on both sides of the door. Please note that the FIR Craftsman door uses a wider flush molding around the glass than does the MAHOGANY Craftsman doors. This flush style glazing is true to the architectural design of original Craftsman, Mission, and Shaker style doors of 100 years ago.

Unique Mortise and Tenon Feature for Artisan Distressed finish option

GlassCraft offers Craftsman style doors with either our "Estate Collection" or our "Artisan Collection" finish options. The Artisan Collection Antique and Distressed options feature our premium hand-finished colors and textures. For these Craftsman style doors, the Artisan Distressed finish includes unique "mortise and tenon" faux door pegs as shown in the photo to the right. Our Artisan Collection Distressed factory finish options provide a combination of special antique patina, natural bur marks, rustic characteristics, indentations, pits, scores, and worm holes. (No door peg marks on Artisan Antique finished doors). These Artisan finishes, wood grains and textures create the unique Craftsman Mahogany appearance that is most authentic.

Please note: The photos in this catalog offer an indication of the final appearance, but due to variations in texture, grain, and color of the material, the actual appearance will vary.

GBG (Grille-Between-Glass) DOORS

FIBERCRAFT COLLECTION

The FIBERCRAFT GBG (Grille-Between-Glass) COLLECTION

Patented VinciLites® GBG Panels

The wrought-iron inspired VinciLites® Collection of decorative “grille-between-the-glass” or GBG doors are unique in their appearance, and feature simulated hand-tooling marks and unique designs. GlassCraft has multiple US Patents approved for this product. Available in all door sizes, there are six GBG grille designs to choose from: Austin, Cantania, Novara, Palermo, Salento, and Florence. Each decorative grille is finished in Antique Black, and mounted between two pieces of tempered safety glass. There are four glass texture options available with varying obscurity levels – all of which allow daylight to enter. All VinciLites® designs are registered trademark designs owned by GlassCraft.

WROUGHT IRON & STEEL GRILLE ENTRY DOORS

FIBERCRAFT COLLECTION

The FIBERCRAFT IRON & STEEL GRILLE DOOR COLLECTION

Patented FerraLites® Wrought Iron or Steel Grilles

GlassCraft's FerraLites® External Wrought Iron or Steel Grille Series features real handmade wrought iron grilles or CNC Cut Modern Steel grilles, along with textured insulated glass panels. This patented design features a decorative metal grille that is "hinged" to allow the grille to be opened for ease of cleaning. The iron grilles are powder-coated in an antique black color. Thirteen metal grille design styles are available, and each grille is available in up to 6 glass texture options with varying obscurity levels. The degree of "obscurity" is noted for each glass texture option (next page). The glass panels use tempered safety glass to make a two-layer-thick safety glass panel. GlassCraft has multiple patents on this unique product.

*Real wrought iron,
hand forged by
real artisans.*

Decorative Grilles Open for Cleaning

GlassCraft's external wrought iron grilles include a patented operating grille hinge mounting system that makes cleaning the glass easy. Grilles may be locked into place with a locking screw.

Operable wrought iron grilles

The FIBERCRAFT IRON & STEEL GRILLE DOOR COLLECTION

Textured Glass Options for Wrought Iron/Steel Grille Doors

Choose from 6 different glass texture options to complement your Iron & Steel Grille composite entry door. The glass textures shown here are produced using a tempered double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies depending upon the glass texture chosen.

Traditional Wrought Iron Grilles or CNC Cut Steel Modern Grilles

The decorative grilles shown in this section are either real hand-made wrought iron grilles (photo at far right), or are laser or plasma cut steel grilles (photo at near right), cut on CNC machines. These iron or steel grilles are noted throughout this section. Either way, they mount and function on the door the same way, and all are powder-coated for durability. Several of the doors with Wrought Iron Grilles also have matching sidelites available. These are noted in this section.

Steel Grille

Wrought Iron Grille

IMPACT Pre-hung Units with Exterior Wrought Iron Grilles

All entryways with our exterior wrought iron or steel grilles feature a special powder-coated finish layer on the decorative grille. This coating is commonly used on offshore oil-rigs, applied to metal parts to resist rusting and corrosion. While this coating significantly enhances the durability of these decorative wrought iron grilles, we do not warrant the grilles or hardware finish against corrosion.
